

FLOOR SAW SAFETY TRAINING

(Cut masonry using a floor, road or flat saw and associated tools and equipment)

Training and assessments conducted by **A Plus Training Solutions**, holder of Certificate IV Training and Assessment (TAE40116).

Purpose

Provide participants with the knowledge and skill to:

1. Safely cut concrete using a Floor Saw
2. Apply recommended cutting techniques as per Worksafe WA Code of practice "Concrete and Masonry Cutting and Drilling" 2019
3. Safely perform appropriate set up, maintenance and clean down tasks correctly

Recognition of Training

A Certificate of Competency and /or Verification of Competency (VOC) will be issued to applicants who meet the assessment criteria required for this competency. This may require supplementary evidence in the form of a report from a suitable supervisor, or further assessment.

Location

Courses will where practicable be conducted on client's premises. Sufficient concrete will be needed for each operator to demonstrate practical competency with the equipment. If sufficient area or venue is not available, a venue and practical activity site may be organised at additional cost.

Duration

- ½ - 1 day (depending on prior experience of participants).

Course Fees

The courses will be run in groups of 6 + participants at a cost of \$275.00 (GST Free) per person:

Individuals or smaller groups should contact us, as we may be able to fit you into a larger group, otherwise fees will be negotiated.

A surcharge fee may apply for work on weekends or public holidays.

Country Clients

Trainer's travel and accommodation costs may need to be added where applicable.

Content Summary

Personal protective equipment

Hazard/ risk assessment and management
Blade pinch hazards
Authorised pre start, maintenance and servicing of equipment
Correct choice of equipment to facilitate concrete cutting
Setting up of floor saw for best ergonomics
Correct use of water as coolant and dust suppression
Practical application and skills development
Safe handling & cutting techniques
Clean down of machine and work area
Supervised written and/or verbal and practical assessment

Equipment

- Participants will need to bring their own PPE (personal protective equipment) including:
 - Approved double eye protection (safety glasses, goggles and / or perspex visor)
 - Hearing protection (ear plugs or ear muffs)
 - Safety boots
 - Gloves
 - Leg protection, (long trousers)
 - High visibility clothing if applicable
 - Sunscreen

If you are unable to provide all this equipment please contact us so we can make other arrangements.

All other required equipment and training notes are provided for participant's use.

Demonstration of Competence:

From experience, we find that people have different levels of ability and experience when it comes to handling machinery.

If a person, due to a lack of experience, requires more time to develop their skills, more time for practical application may be needed increase their skills up to a competent level.

Personal Requirements:

Depending on length of course, location and conditions food and drinking water may also be needed.
